

INTRODUCING MOMENTICK'S EMISSIONS INTELLIGENCE

Momentick harnesses AI & high-resolution satellite imagery for accurate methane detection and quantification.

FREQUENT MONITORING

Multi-satellite data with high revisit rates & near-zero down time.

GLOBAL COVERAGE

Data quality & accuracy on a planetary scale.

HISTORICAL DATA

Benchmark emissions, spot trends, and drive efficient asset remediation

OFFSHORE INCLUDED

Comprehensive onshore and offshore monitoring capabilities.

NO INTEGRATION NEEDED

Easy software onboarding with no hardware required. Insights within days.

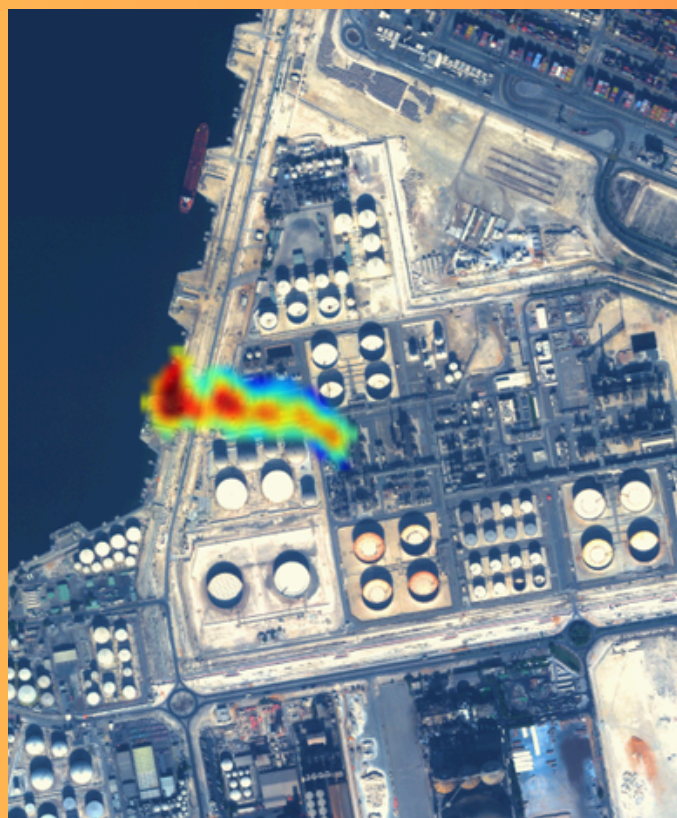

IMMEDIATE NOTIFICATIONS

A notification is instantly generated each time emissions are detected in new revisit imagery.

WWW.MOMENTICK.COM

Accelerating the transition to a **lower emissions future**, by making harmful gases **detectable and manageable**.

METHANE MONITORING FOR OIL & GAS

PREVENT GAS LEAKS & REDUCE COST

Obtain critical insights into revenue losses due to unplanned methane leaks, even in remote locations.

ENSURE COMPLIANCE

Ensure OGMP 2.0 & regulatory compliance with high-frequency, large-area & pinpoint monitoring.

REDUCE SCOPE 3 EMISSIONS

Accurately track Scope 3 emissions, minimizing reputational, operational & financial risks to your business.
